## PROJECTS

---

### BitShelf - A virtual shelf for your bits and bytes ([Link](#))

(*Spring Boot, Spring Security, Java, React.js, MongoDB, Tailwind CSS, AWS*)

July 2025

- Engineered a Spring Boot REST API to securely handle file uploads, downloads, deletions, and access control, improving file handling efficiency by 40%.
- Designed and optimized endpoints for public/private file toggling and shareable link generation, enabling seamless collaboration for 100+ test users.
- Integrated Razorpay API for secure payment processing, supporting premium storage features and simulating a scalable monetization model projected for 1K+ users.

### Internify - Internship tracking platform ([Link](#))

(*Spring Boot, Java, MySQL, Spring Security, RabbitMQ, React.js, Tailwind CSS, GCP*)

May 2025

- Engineered a scalable, event-driven backend using Spring Boot and RabbitMQ. Improved API responsiveness by over 90% by offloading tasks like audio transcription and email sending.
- Built a robust, asynchronous email and reporting system that guarantees 100% delivery of AI-generated reports to users in under five minutes, demonstrating strong system design.
- Developed a comprehensive AI system with Google Cloud APIs (Speech-to-Text & Gemini) to transcribe audio answers and provide a structured evaluation, including a match score from 1-100.
